一天的健康生活，不妨從早餐一顆有機雞蛋開始。除了民衆熟知的有機稻米、蔬菜及水果等農產品之外，雞蛋其實也可以很有機，在飼養、生產、洗選

乃至物流等過程，都滿足高衛生標準，尤其是雞飼料採用有機食材組成，且產蛋期間不餵食促進產蛋藥物，從源頭上讓消費者時「食」安心。

To start your day in a healthy way, you might like to have an organic chicken egg for breakfast. In addition to such well-known organic farm products as rice, vegetables and fruit, chicken eggs can now be produced organically. Throughout the process of feeding, production,

washing and logistics, high sanitary standards are required and met. Chickens are fed organic feed and no hormones or drugs can be used in organic-egg production. Eggs thus produced ensure consumer health.
